Professional performance

Professional
performance

Multiple functions in seconds

Use the cutter function to **cut, grind, mix, knead or emulsify** any product, in seconds.

Professional performance

A model for every requirement

Two product ranges, **ACTIVE** with **two fixed speeds** which is extremely easy to use and **ULTRA**, with **variable speed** and advanced features offer a production cycle of up to 4 kg of product.

Range	ACTIVE		ULTRA	
Model	K-52	K-82	KE-5V	KE-8V
Speed	2 speed	2 speed	Variable	Variable
Cutter bowl	5.5 l	8 l	5.5 l	8 l
Bowl capacity	3 kg	4 kg	3 kg	4 kg
Covers (From - to)	20-75	20-100	20-75	20-100

Professional
performance

5.5 and 8 litre cutter bowls

Sammic cutters and emulsifiers are available with a **5.5 or 8 litre capacity bowl** for grinding, mixing, kneading, etc. 3 or 4 kg of product, in seconds.

Professional
performance

Cutting blades for each need

The cutter bowl is delivered as standard with a rotor with **toothed blades**.

It can optionally be fitted with smooth and perforated blades.

Hub with toothed blades

The toothed blades are **ideal for cutting parsley and products with a high water content** that can be damaged using smooth blades. It is **also good for frozen products, nuts, cured ham, cooked meat, purees** (the puree is finer with this type of blade).

Hub with flat blades

The flat blades are indicated **for cutting raw meat**, because the edge and its shape can easily cut the nerve strands and difficult points of the meat. They are also recommended **for vegetables in general**, as it chops very well with only a small quantity of liquid from the product. The smooth blades are **ideal for onions, although the Cut&Mix mixer must be used** because the product adheres to the sides of the hopper.

Hub with perforated blades

Use the perforated blades to **make sauces and mix products** such as **mayonnaise, seafood cocktail sauce, aioli garlic mayonnaise**, etc. as well as for certain types of **pastry dough**.

Professional performance

Speed selection

Cutter K: Two speeds

The K cutter has two fixed speeds, to obtain optimum performance with each product.

KE cutter/emulsifier: Variable speed

The available speed range means that the machine can be adapted precisely to the product being processed. Thanks to the "brushless" motor technology, the motor maintains the torque throughout the speed range, obtaining maximum efficiency at all times.

Professional
performance
Active

High power asynchronous motor

The **two-speed cutters** have high-performance, ventilated asynchronous motors that **offer maximum performance at fixed speeds**.

Professional performance

Ultra

"Brushless" technology: Maximum efficiency

"Brushless" technology is synonymous with **optimal performance at any speed**.

The KE cutter-emulsifiers have high-efficiency motors with "brushless" technology. "Brushless" motors are **highly efficient**, enabling the same force to be exerted throughout the speed range. They also **weigh less**, require less space and, since they don't require ventilation, improve the **water tightness** of the machines.

Professional performance

Ultra

Optional in the Active range

The "Cut&Mix" scraper prevents the product from adhering to the edges of the bowl, preventing the product from overheating and obtaining a more homogeneous final product.

"Cut&Mix" scraper: A perfect result

Professional
performance
Ultra

Reverse function

Thanks to the reverse function,
the blades rotate backwards,
between 100 and 500 rpm,
mixing the product **instead**
of cutting. This means that
ingredients can be added
during the cycle and mixed with
the product already cut.

Professional performance

Ultra

Built-in programmes, specific functions*

The machine has three special programmes: dense texture, fine texture and **PrecisePulse** (pulses, ideal for chunky texture).

By combining different speeds and times in each of these programmes, the cutter optimises the parameters to obtain a uniform and consistent result in each case.

* Feature available on machines from December 2021.

Professional
performance
Ultra

Program customization: Recipe standardization*

In addition to the three built-in programmes on the machine, the ULTRA cutters allow the user to **create up to 9 custom programs**. In this way, by combining different speeds and different times, the user can standardize their own recipes to always obtain the same result automatically and without being aware of the machine.

* Feature available on machines from December 2021.

Professional performance

Stainless steel motor block

The stainless steel motor block has a polished external finish and optimal durability. Also, it is easy to clean. The robust aluminium lid makes the entire unit highly durable.

Maximum
comfort
for the user

Maximum comfort
for the user

Opening for adding ingredients

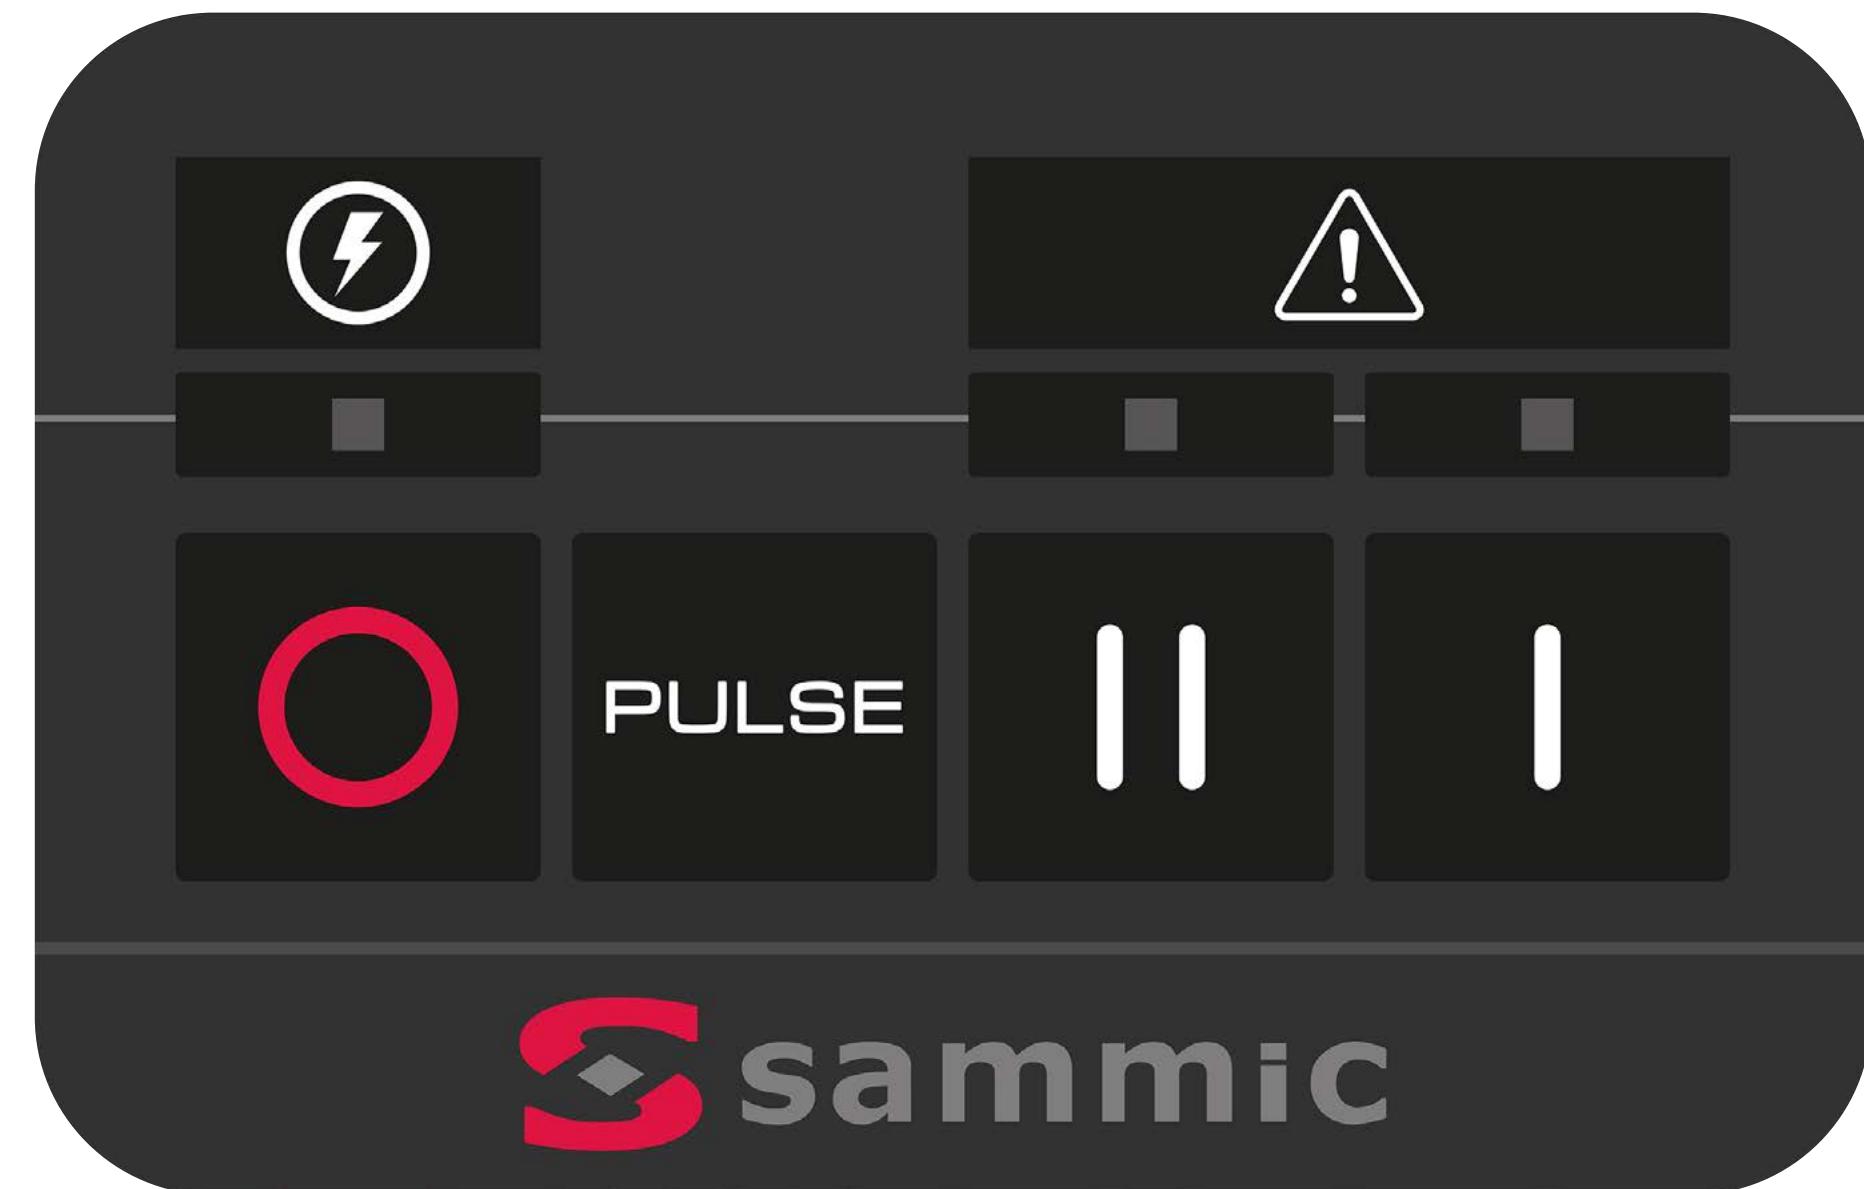

The cutter bowl's cover has an opening through which ingredients can be added during the cycle. The opening has a cover that can be closed when it is not being used, thereby avoiding splashing.

Maximum comfort
for the user

Active

Intuitive control panel

The **cutters K** have very simply designed control panels
that are highly intuitive to use.

Maximum comfort
for the user
Ultra

Advanced control panel

The **cutters-emulsifiers KE** use "brushless" technology and have an advanced control panel. Very intuitive to use, the panel on these machines offers all the information at a glance. The user therefore has maximum control of the process.

Maximum
safety and
hygiene

Maximum safety and hygiene

Bowl easy to detach

The bowl on Sammic cutters and emulsifiers is easily removable, without tools, for exchanging and cleaning. They are **versatile and easy to maintain.**

Maximum safety and hygiene

Easy to clean

The rotor and the bowl can be washed in a dishwasher, guaranteeing optimum durability over time.

Maximum safety and hygiene

Combination of safety systems

All cutters and emulsifiers **K/KE** have combination of safety systems that ensure user protection when the machine is in operation.

The position of the bowl and its cover **have microswitches that prevent them from being inadvertently switched on** and the shut-off safety element prevents accidental start-up of the blades in case of power failure.

Maximum safety
and hygiene

NSF accredited

Sammic cutters and emulsifiers K/KE
are **standard 8 NSF certified**, which is
a safety and hygiene guarantee.

Sammic:

A leader's
guarantee

Sammic:

A leader's guarantee

100% tested

All machines manufactured by Sammic **are individually tested** at the end of the assembly line, thus minimising the risk of post-sales incidents.

Sammic: A leader's guarantee

Designed and manufactured by Sammic in collaboration with Chefs

Sammic's **corporate chef** and team actively participated in the entire Sammic cutter development project. Before they are launched, all models are also tested by the corporate chef and by Sammic **ambassador chefs** from around the world.

And finally, a continuous feedback channel throughout the product's service life enables **continuous improvement** so that Sammic continues to be **#TheRightChoice** for users around the world.
