Professional performance

Professional performance

Veg prep function

A perfect cut

In developing the new range, all the cuts that the different disc and grid combinations offer have been studied in detail.

The new design of the machine, with tighter tolerances, together with the improvements made to the discs and grids, enables a **perfect result** whatever the product and the desired cut.

Professional performance

Veg prep function

Thanks to the renewed disc and grid design, **less effort is required for cutting**, obtaining clean and uniform cuts with practically no shrinkage.

New discs and grids

Professional
performance
Veg prep function

Clean and uniform cubes

The combination of the **FC discs** with their corresponding **FMC grids** ensures precise and clean cube cuts, with no liquid generated.

Professional performance

Veg prep function

New “Déli-cut”: A cut with a unique identity

The new **Déli-cut** is a brunoise type cut of 4 x 4 x 8 mm, making it unique for cooking, sautéing, dressing salads and preparations, cooking fillings, and much more.

Professional
performance
Cutter function

Multiple functions in seconds

Use the cutter function to
cut, grind, mix, knead or
emulsify any product, in
seconds.

A model for every requirement

All the combined models are **variable speed**. The head varying in the cutter function and the size of the bowl varying in the cutter function between the different models. The offer is complemented with a wide range of accessories available for each model.

Range	ULTRA			
Modelo	CK-35V	CK-38V	CK-45V	CK-48V
Speed	Variable	Variable	Variable	Variable
Cutter head	Universal	Universal	Large capacity	Large capacity
Production/h	200 - 900 lb	200 - 900 lb	400 - 1300 lb	400 - 1300 lb
Cutter bowl	5.5 l	8 l	5.5 l	8 l
Bowl capacity	6.61lb	8.82 lb	6.61 lb	8.82 lb
Covers	100-450	100-450	100-600	100-600

Professional performance

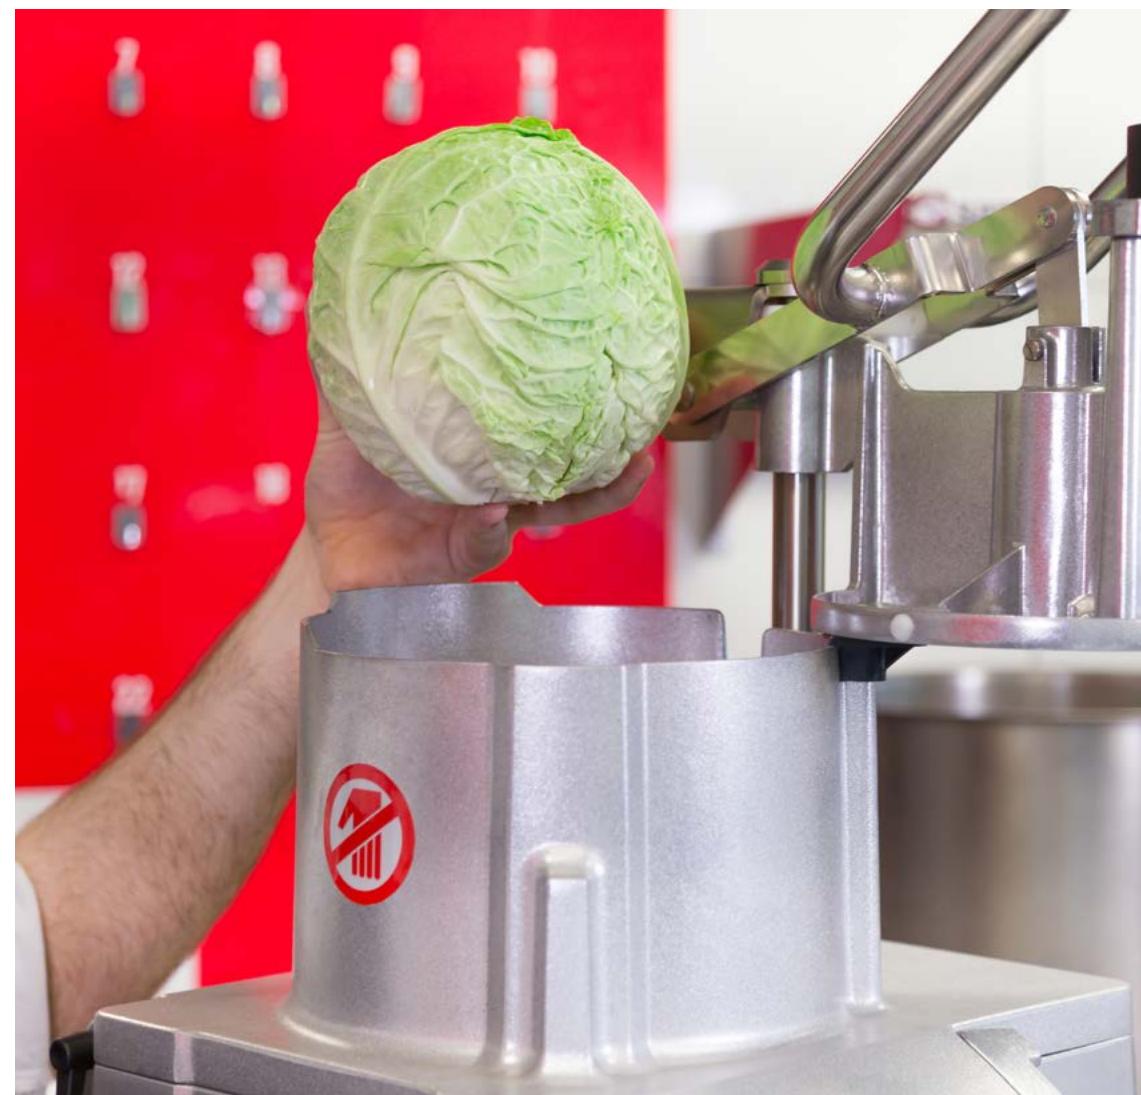

Veg prep function

Heads for each requirement

The available **heads are interchangeable** depending on the models so that the machine can adapt to the type of product processed and the desired production output.

Universal hopper

Large Capacity Attachment

Automatic Hopper

Long vegetable attachment

Professional performance

Veg prep function

Production/hour ranges from **900 to 1300 lb**, depending on the model and product used.

On the CK-45V / CK-48V models, the size of the inlet mouth allows whole products such as cabbage to be inserted.

Higher production

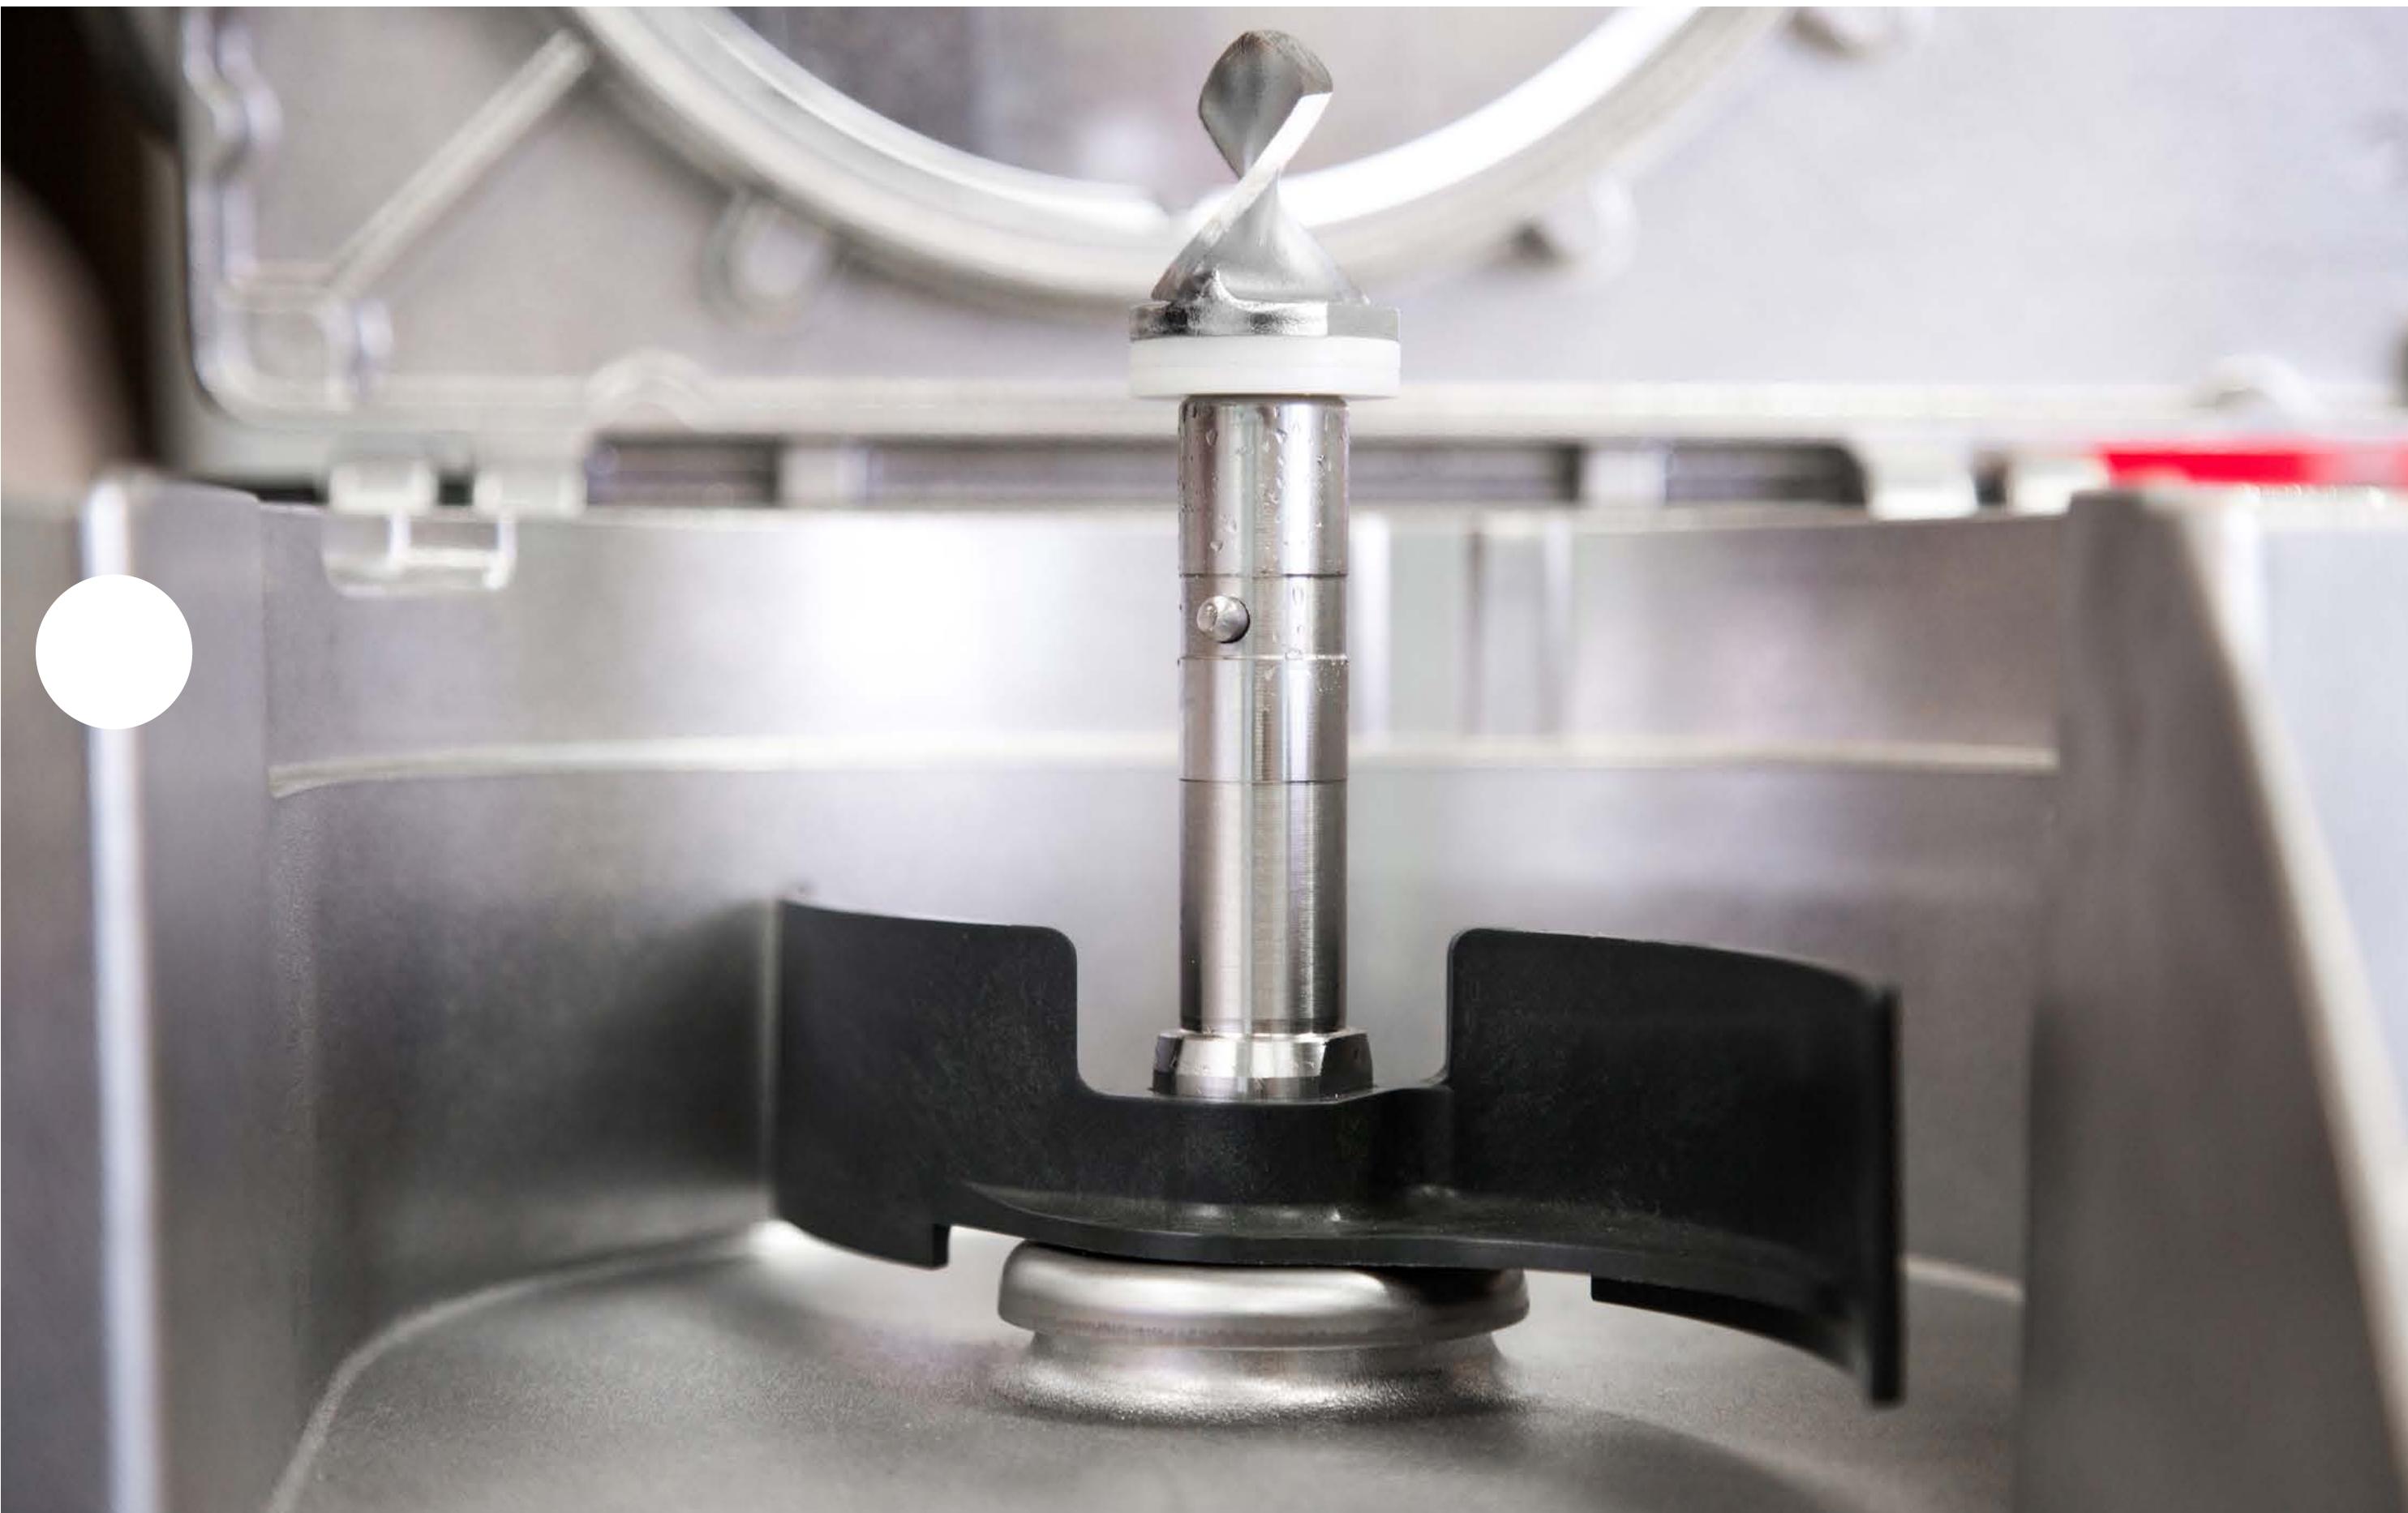

Professional performance

Veg prep function

High ejector

The CK-45V / CK-48V models are equipped with high ejector. The high ejector enables a higher quantity of product to be processed, **obtaining higher yields.**

Professional
performance
Veg prep function

Wide range of discs and grids

The range of discs and grids available enables more than **70 different types of cuts.**

Professional performance

Support-car

The support-car enables work to be carried out at the appropriate height, **adapts to Gastronorm measures** for collecting the product and makes it easy to move the machine.

Professional
performance
Cutter function

5.5 and 8 litre cutter bowls

Sammic cutters and emulsifiers are available with a **5.5 or 8 litre capacity bowl** for grinding, mixing, kneading, etc. 3 or 4 kg of product, in seconds.

Professional performance

Cutter function

Cutting blades for each need

The cutter bowl is delivered as standard with a rotor with **toothed blades**. It can optionally be fitted with smooth and perforated blades.

Professional performance

Cutter function

Hub with toothed blades

The toothed blades are **ideal for cutting parsley and products with a high water content** that can be damaged using smooth blades. It is **also good for frozen products, nuts, cured ham, cooked meat, purees** (the puree is finer with this type of blade).

Professional performance

Cutter function

Hub with flat blades

The flat blades are indicated **for cutting raw meat**, because the edge and its shape can easily cut the nerve strands and difficult points of the meat. They are also recommended **for vegetables in general**, as it chops very well with only a small quantity of liquid from the product. The smooth blades are **ideal for onions, although the Cut&Mix mixer must be used** because the product adheres to the sides of the hopper.

Professional
performance

Cutter function

Use the perforated blades to **make sauces and mix products** such as **mayonnaise, seafood cocktail sauce, aioli garlic mayonnaise**, etc. as well as for certain types of **pastry dough**.

Professional performance

Speed selection

The available speed range **enables the machine to be adapted to the product being processed**, on the slicing as well as the cutting function.

Also, thanks to the brushless motor technology, the motor maintains the torque throughout the speed range, obtaining maximum efficiency at all times.

Professional
performance

Brushless technology: maximum efficiency

Brushless technology is synonymous with
optimal performance at any speed.

The variable speed cutters are equipped
with high-efficiency motors using brushless
technology.

Brushless motors are **highly efficient**,
enabling the same force to be exerted
throughout the speed range.

They also **weigh less**, require less space and,
since they don't require ventilation, improve
the **water tightness** of the machines.

Professional performance

Brushless technology: Force Control System

All models are equipped with the exclusive "Force Control System". The FCS screen shows the force made by the motor at all times. It also enables an audible warning to be programmed for when the machine exceeds the established force. The user therefore obtains the desired cut quality in each product and at all times, achieving an optimum and **uniform cut without shrinkage**.

Professional performance

Cutter function

The "Cut&Mix" mixer, standard on all models, **prevents the product from adhering to the edges of the bowl**, preventing the product from overheating and obtaining a more homogeneous final product.

"Cut&Mix" mixer: a perfect result

Professional performance

Cutter function

The machine has three special programmes: dense texture, fine texture and **PrecisePulse** (pulses, ideal for chunky texture). In addition to the three built-in programmes on the machine, the KE-4V cutter allows the user to create up to 9 custom programs.

In this way, by combining different speeds and different times, the user can standardize their own recipes to always obtain the same result automatically and without being aware of the machine.

Built-in programmes and program customization

Professional performance

Cutter function

Reverse function

Thanks to the reverse function,
the blades rotate backwards,
between 100 and 500 rpm,
**mixing the product instead of
cutting.**

This means that ingredients
can be added during the cycle
and mixed with the product
already cut.

Professional
performance

Stainless steel motor block

The stainless steel motor block has a polished external finish and optimal durability. Also, it is easy to clean. The robust aluminium lid makes the entire unit highly durable.

Maximum
comfort for
the user

Maximum comfort
for the user

Veg prep function

Lateral product output

As the product exits on one side, the cutters **require less space on the work surface** and resulting in optimal work flow in the preparation area.

The product output opening is designed to direct the product, **preventing splashing** in the work area.

Maximum comfort for the user

Veg prep function **CK-35V / CK-38V**

The CK-35V / CK-38V models perform the cutting operation in a single movement, achieving **maximum production without user fatigue**.

Ergonomic design

Maximum comfort for the user

Cutter function

Opening for adding ingredients

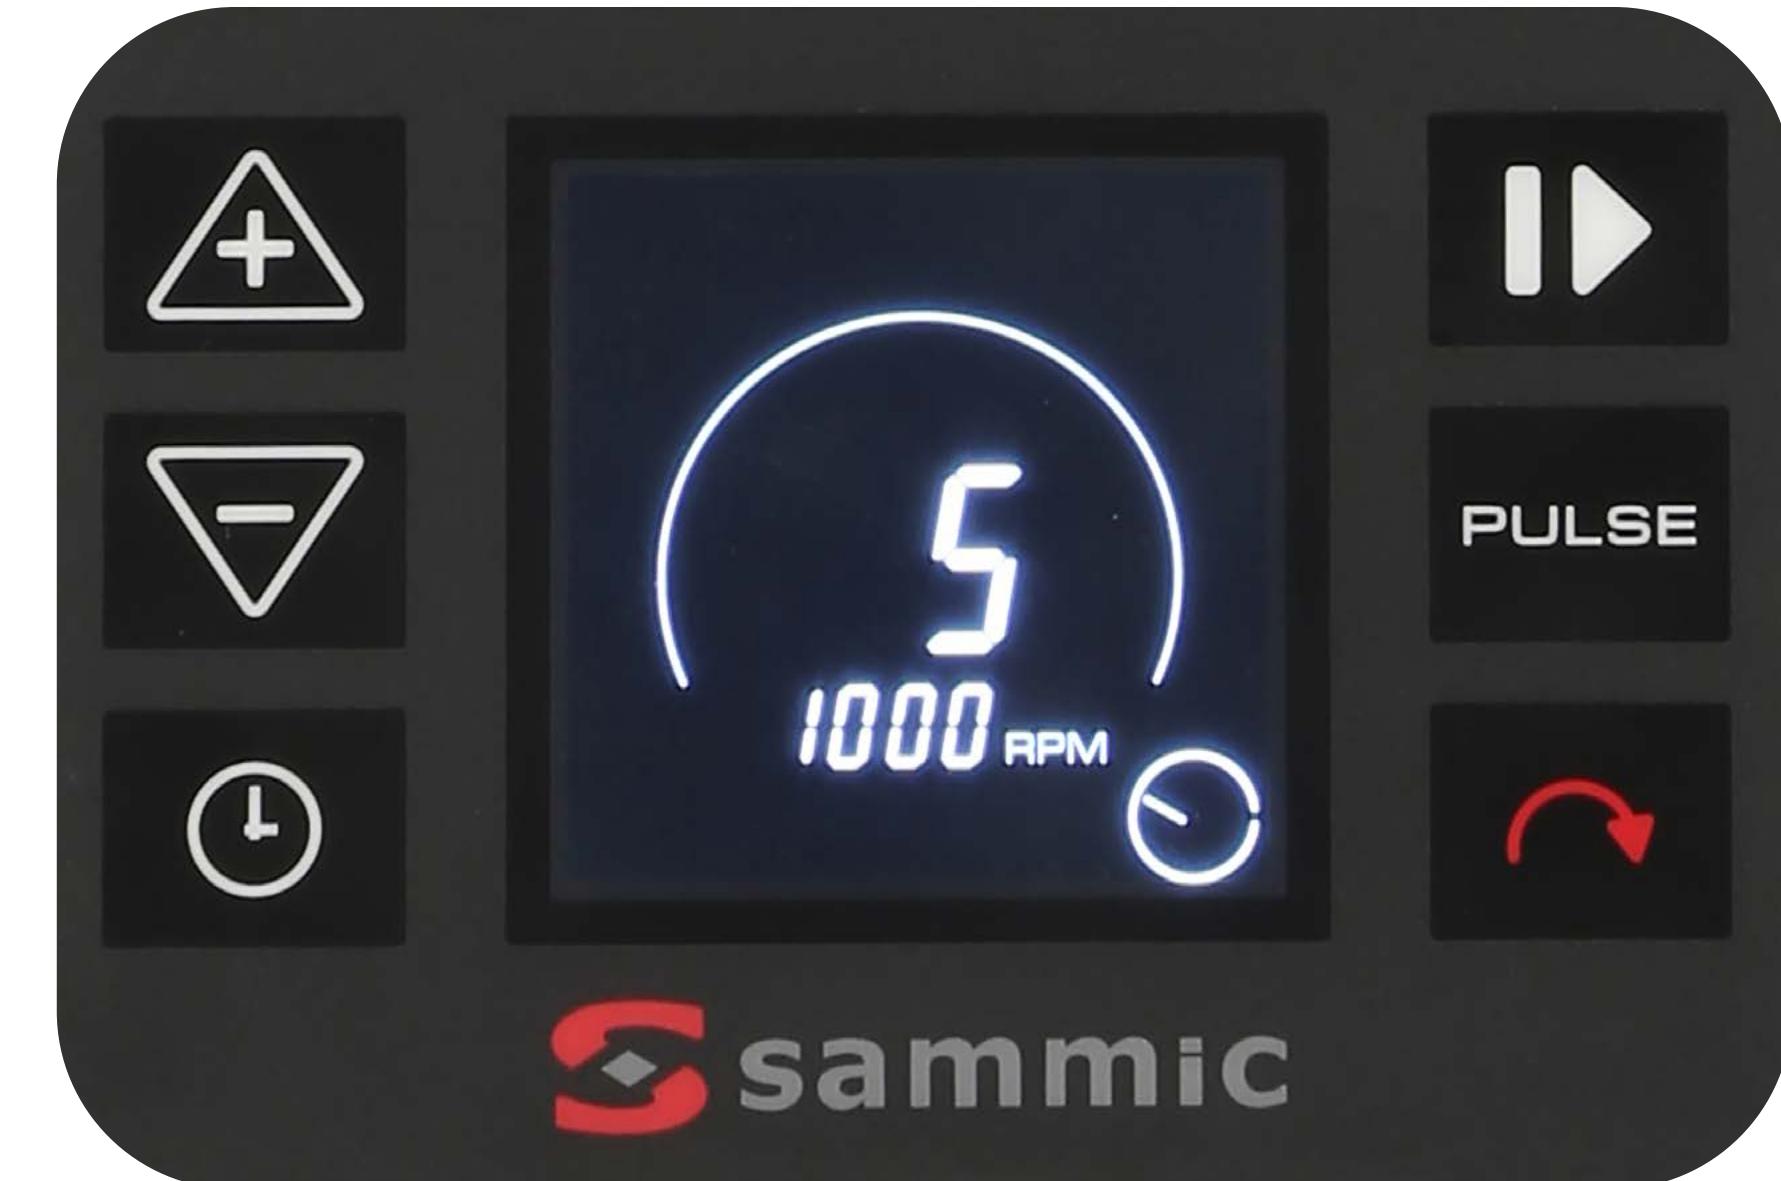

The cutter bowl's cover has an opening through which ingredients can be added during the cycle. The opening has a cover that can be closed when it is not being used, thereby avoiding splashing.

Maximum comfort for the user

Advanced control panel

The **combi CK** use **brushless technology** and have an advanced control panel. Very intuitive to use, the panel on these machines offers all the information at a glance. The user therefore has maximum control of the process.

Maximum
safety and
hygiene

Maximum safety and hygiene

Head and cover easy to detach

The head and cover on the Sammic cutters can be easily removed without tools, for exchanging and cleaning. This also makes them versatile and **easy to maintain.**

Maximum safety and hygiene

Veg prep function

New shredding & grating discs

The new SH grater discs can be removed without using tools and can be washed in the dishwasher.

Product accumulation between the support and the disc is therefore avoided, offering the highest hygiene guarantee.

Maximum safety and hygiene

Veg prep function

Grid cleaning kit

The grid cleaner kit is designed to remove all the surplus product that is embedded in the grid after the cutting process. The kit consists of a base that has cleaners for the most common grid sizes.

Maximum safety and hygiene

Combination of safety systems

All Sammic cutters are equipped with a combination of safety systems that ensure user protection when the machine is in motion. The position of the head and its cover have **microswitches** that prevent them from being inadvertently switched on and the shut-off safety element prevents accidental start-up of the blades in case of power failure.

Maximum safety
and hygiene

NSF accredited

Sammic CK cutters are
standard 8 NSF certified,
which is a safety and hygiene
guarantee.

Sammic:

A leader's
guarantee

Sammic: A leader's guarantee

100% tested

All machines manufactured by Sammic **are individually tested** at the end of the assembly line, thus minimising the risk of post-sales incidents.

Sammic:
A leader's guarantee

The experience of a cutting specialist

Sammic has been designing and manufacturing cutters for more than 50 years.

Exports to more than 100 countries has enabled the company to standardise its quality.

Result: **#ThePerfectCut** for any product.

Sammic: A leader's guarantee

Designed and manufactured in collaboration with chefs

Sammic's **corporate chef** and team actively participated in the entire Sammic cutter development project. Before they are launched, all models are also tested by the corporate chef and by **Sammic ambassador chefs** from around the world. And finally, a continuous feedback channel throughout the product's service life enables continuous improvement so that Sammic continues to be **#TheRightChoice** for users around the world.
