## BESCHREIBUNG

Vermögen 12 oder 26 lt. Programmierbar.

Using these devices will lower operation costs, improving system performance and equipment lifespan.

- ✓ Their operation involves food grade ionic exchange resins, that absorb calcium and magnesium salts from water.
- ✓ Automatic single-unit water softener with a fibreglass cylinder and an "autotrol" valve.
- ✓ The electromechanical time valve features a timer to schedule the number and the frequency of regeneration cycles, based on the assumed water consumption and hardness.
- ✓ Weekly timer programming; the timer can be programmed to carry out from a minimum of one regeneration per week up to a maximum of one regeneration per day.
- ✓ Regeneration phases: - Counter current salt water intake - slow rinsing - fast rinsing - restoration of the brine - operation
- ✓ Fast unions to connect to the brine.
- ✓ Water mains' connection: 1/2", 3/4" with mixer, 1" with mixer.
- ✓ During their regeneration water softeners automatically enter By-pass mode allowing non-softened water to be used.
- ✓ Compact design.
